Mr. Paul Smith

June 9, 1969

H. Wakeham

The attached correspondence which has come to me recently as a member of the Tobacco Working Group indicates that Dr. Charles Kensler of Arthur D. Little and Dr. William Bates of Liggett & Myers have been having some communications with the Federal Trade Commission on the subject of gas phase smoke. I am somewhat distressed to discover the extent to which Dr. Kensler has indicated the possible components in gas phase smoke and their biological activity.

You may wish to pass on this information to Mr. Holtzman.

Regards.
